

CASE STUDY

LEE ENTERPRISES **CASE STUDY: CUSTOMER EXPERIENCE**, **REVENUE** AND INSIGHT

LEE ENTERPRISES

Lee is a leading source of print and digital news in over 50 markets across the U.S. Currently driving significant digital growth and holding prominent historical standing in the communities they serve. Lee required a comprehensive means of managing and communicating with its large network of subscribers.

Lee needs to be able to communicate with 25 million readers quickly and effectively. As the main source of local news in the communities they serve, Lee values solutions that offer full customization capabilities to tailor reader outreach efforts to different markets. To accomplish this, Lee's readership outreach called for lightning fast development and customization of highly specific campaigns for retention, customer satisfaction and other performance indicators.

- Lee turned to TCN's cloud-based contact center solution to capitalize
 on our extensive circulation and retention experience. Lee relies on
 TCN to schedule and implement automated calls addressing first and
 last days of grace, new start verifications, subscription updates,
 credit card declines, Vacation Restarts, and more. TCN also
 empowers Lee to optimize agent time by including an option to
 speak to a live representative during automated calls, maximizing
 outreach while restricting agent time to just those complex calls that
 require a human touch.
- In addition to readership contact, Lee also uses TCN to pull and analyze daily reports on recipient activity and responses. These figures remove the guesswork from audience targeting, helping Lee better understand its reader base and make informed decisions regarding reader engagement and activity.

THE SOLUTION continuted

- Upload one list for 50 pubs
- Break out to 50 different templates
- Personalize each template to specific pub/campaign
 - Caller ID Greeting Call-back # Linkback #
- Assign start time by time zone/pub preference
- Process CC Payments
- Register Missed Deliveries
- Linkback to customer service

THE 'WOW' FACTOR

- Intricate Customization: Under significant time constraints, TCN helped Lee design and implement a complex retention system from the ground up in ONE WEEK. This complex project was one of TCN's many highly successful customizations. "No matter what we're working on, my representative is attentive and makes sure we get exactly what we need to succeed." TCN consistently delivers quick, high-quality custom work to help clients build projects to their precise specifications, resulting in perfectly tailored and highly effective communication tools.
- Quality Support: From installation to ongoing support, TCN goes above and beyond
 to provide reliable, responsive service that promotes client growth. "The
 implementation process was smooth and timely, and I can always rely on customer
 support when I need it." Lee isn't the only company that relies on TCN to go the
 extra mile in optimizing its advanced solution to meet their needs. Expert TCN
 representatives get to know each client inside and out, personalizing support and
 customizations to their unique operations. "One of the biggest values of using TCN is
 the customer service I have received."
- Improved Functionality: TCN's seamless integration into existing operations and extensive customization and automation capabilities drive efficiency, productivity and revenue. "We love working with TCN. They address all our needs in a timely, professional fashion, and everything runs smoothly on a daily basis."
